

Crop production.

Effect of population density on growth and yield of aloe (<i>Aloe barbadensis</i> M.)	1	1-12
Evaluation of four propagation methods in field of <i>Trichanthera gigantea</i> and establishment costs for protein bank	1	13-22
Use of PPM (Plant Preservative Mixture) to control bacterial contaminants in the multiplication <i>in vitro</i> of sugarcane.	1	23-33
Rooting of acerola (<i>Malpighia glabra</i> L.)	1	34-41

Animal production.

Use of leucaena meal (<i>Leucaena leucocephala</i>) on the post-weaning lamb feeding during dry season	1	42-53
Environmental influence on seminal traits in Holstein Friesian and Brown Swiss bulls born at tropical region	1	54-64

Food technology.

Persistence of Organophosphorus Malathion and Chlorpyrifos insecticides in Guava (<i>Psidium guajava</i> L.)	1	65-75
---	---	-------

Socioeconomy.

Description of the commercialization process of sugar cane, Trujillo state, Venezuela.	1	76-89
--	---	-------

Crop production.

Forced production of mango (<i>Mangifera indica</i> L.) planted at high density (278 trees ha ⁻¹) in the growth period.	2	99-111
Water relations and gas exchange in <i>Theobroma cacao</i> var. Guasare under periods of water deficit	2	112-120
Growth of <i>Racosperma mangium</i> Willd during nursery phase irrigated with waste waters	2	121-129
Rooting of acerola cuttings (<i>Malpighia emarginata</i> Sessé & Moc. Ex DC.)	2	130-142

General index Vol. 21, 2004 (Nos. 1-4)

Comparative effects of two forage species on rhizosphere pH and solubilization of phosphate rocks of different reactivities	2	143-156
Water erosion and solar radiation use for forage species in the Coxacoaco river basin, Mexico	2	157-169
Physical conservation srveying in of Lavapes River basin, Botucatu, sp	2	170-184
Invasion of <i>Ralstonia solanacearum</i> in tissue of tomate stem (<i>Lycopersicon esculentum</i> Mill)	2	185-194
 <i>Crop production.</i>		
Effect of seeds storage coffe (<i>Coffea arabica</i> L. var. Catuai amarillo) on emergence	3	205-213
Agronomic potential and agronomic effectiveness of three phosphate rocks with different mineralogical composition	3	214-228
Susceptibility of <i>Vasconcellea cauliflora</i> to Papaya ringspot virus	3	229-240
Obtainment and characterization of pectin since of the peel of passion fruit (<i>Passiflora edulis</i> f. flavicarpa Degener)	3	241-251
 <i>Food tecnology.</i>		
Effect of the fertilization, plant density and time of cutting on yield and quality of the essential oil of <i>Cymbopogon citratus</i> Stapf.	3	252-266
 <i>Socioeconomy.</i>		
Economical useful life of the banano (<i>Musa</i> AAA Cavendish cv Grand nain) in the alluvial plain of Motatan river	3	267-276
Sustainability, equity and competitiveness of the production systems from La Estrella community, Zulia state	3	277-286
Characterization under a sustainable approach of the urban agriculture production units in the Maracaibo municipality, Zulia state	3	287-303

Crop production.

Effect of vegetables extracts and synthetics fungicides on the micelial growth of <i>in vitro</i> <i>Sclerotium rolfsii</i> and <i>Thielaviopsis basicola</i>	4	315-324
Surveillance and forecast preliminary study for black sigatoka (<i>Mycosphaerella fijiensis</i> Morelet) disease in <i>Musa</i> AAB cv Hartón plantain crop in «Macagua-Jurimiquire», Yaracuy state	4	325-339
Intraplant distribution of immatures lifestages of <i>Antichloris viridis</i> Druce, 1884 (Lepidoptera: Arctiidae) on plantain (<i>Musa</i> AAB, sub – group plantain, cv. Hartón) in the south of lake Maracaibo, Venezuela	4	340-353
Plant height and yield components of six genotypes of the genus <i>Vigna</i> in two locations of Venezuela	4	354-368
Infection time by <i>Dothiorella</i> sp. and symptom onset of guava end rot	4	369-381
Nitrogen fertilization in pineapple crop (<i>Ananas comosus</i> L. Merr) at Paramo Negro community, Iribarren, Lara state	4	382-393
Effect of the Treatments Post harvest on the Temperature and the Index of Fermentation in the Quality of the Cocoa Criollo Porcelana (<i>Theobroma cacao</i> L.) in the South of the Maracaibo Lake	4	394-406
Reaction of twenty sugarcane clones to smut disease <i>Ustilago scitaminea</i> Sydow	4	407-415
Evaluation of fertilizer location in the Horn plantain (<i>Musa</i> AAB) mother's pseudostem after harvesting on growth and production variables	4	416-428
