

**Crop production.**

Identification of seed borne viruses in growing areas of beans ( <i>Phaseolus vulgaris</i> L.) and cowpea ( <i>Vigna unguiculata</i> (L.) Walpers) in Venezuela	1	1-21
Pollen grain study in species of the <i>Heliconia</i> L. genus under optical microscope	1	22-33
Geomorphological description of the Pueblo Viejo river basin, Zulia State	1	34-46
"Cocoa plant ( <i>Theobroma cacao</i> L.)" Phylloplane Mycobiota identification, at the Carraciolo Parra Olmedo municipality, Merida state, Venezuela"	1	47-68
Salinity effect on germination and emergency of seeds of passion fruit ( <i>Passiflora edulis</i> f. <i>flavicarpa</i> )	1	69-80
Correlation between potassium dose, fertilizer placing, mineral composition and yielding of melon ( <i>Cucumis melo</i> L.) at Mara municipality, Zulia state.	1	81-93
Planting density effect of the cassava ( <i>Manihot esculenta</i> crantz) crop development and yielding under agroecological conditions of Maracaibo plain	1	94-112
Efficiency of some leguminous crops to use P from phosphate rock	1	113-132

**Food tecnology.**

Oxidation control of white wines obtained under tropical conditions	1	133-153
---	---	---------

**Socioeconomy.**

Sustainable Development Level of La Victoria, Agricultural Community, Lagunillas municipality, Zulia state	1	154-171
--	---	---------

---

## *General index Vol. 24, 2007 (Nos. 1-4)*

---

### ***Crop production.***

Hydric erosion evaluation at the micro basin of Roja and Colorado creeks in the Valmore Rodriguez municipality, Zulia state	2	183-202
Fate of applied nitrogen by fertilization in a potato crop of the Venezuelan andes	2	203-228
Effect of three irrigation frequencies on seed cotton yield and its components in four upland cotton cultivars ( <i>Gossypium hirsutum</i> L.)	2	229-256
Fertilizers placing effect and the potassium dose on melon ( <i>Cucumis melo</i> L.) yield at Mara municipality, Zulia state	2	257-268
Characterization of associate fungi to strawberry fruit diseases at the Jauregui municipality, Tachira State	2	269-281
Morphological characterization of guava fruit ( <i>Psidium guajava</i> L.) in a farm at Mara municipality, Zulia state	2	282-302
"Relationship between inflorescences, climate and the pollinating in oil palm ( <i>Elaeis guineensis</i> Jacquin) plantations located in south lake of Maracaibo, Zulia state"	2	303-320

### ***Food technology.***

Effect of citric acid on tree tomato maturity	2	321-342
---	---	---------

### ***Socioeconomy.***

Characterization of the wine grape production system in Mara municipality, Zulia state. Venezuela	2	343-366
Sustainable development in the cassava <i>Manihot esculenta</i> Crantz production system in Mara municipality, Zulia state, Venezuela	2	367-387

***Crop production.***

Cercospora apii s. lat. in Venezuela	3	399-414
Optimum temperature and humidity determination in germination and sporulation of five <i>Beauveria bassiana</i> isolates	3	415-425
Seeds morphological characterization of some species of <i>Cassia</i> L. and <i>Senna</i> Mill. (Leguminosae Juss.) genre	3	426-441
Planting date selection as an adaptation strategy to elevated temperature effects on simulated yields of dry bean ( <i>Phaseolus vulgaris</i> L.) in a low mountainous area of Midwestern Venezuela	3	442-467
Distance between rows and pruning height effects in some indicators of <i>Morus alba</i> (L.) under grazing conditions	3	468-480
Inoculum levels of phytopathogenic fungi associated to rice ( <i>Oryza sativa</i> ) seed	3	481-500

***Animal production.***

Characterization of the different production modalities in livestock bovine dual purpose system at Jose Antonio Paez municipality, Yaracuy state, Venezuela	3	501-521
---	---	---------

***Food technology.***

Chemical analysis of Criollo Porcelana Cocoa ( <i>Theobroma cocoa</i> L.) in the South of Maracaibo Lake	3	522-546
--	---	---------

***Socioeconomy.***

Management processes critical nodes of double purpose cattle production systems in Machiques of Perijá, Zulia State	3	547-576
Linking of the university with the agricultural productive sector	3	577-595

***Crop production.***

Response to the plantain ( <i>Musa</i> AAB cv. Horn) yield as a function of the mineral nutrients and its phenological cycle. Part I. Growth and Production	4	607-626
Inoculum quantification in soil and incidence of <i>Macrophomina phaseolina</i> on sorghum hybrids at three locations of the Venezuelan West-central Plains	4	627-641
Growth, soluble carbohydrate and fatty acid concentrations of common purslane ( <i>Portulaca oleracea</i> L.) grown under three irradiance levels	4	642-660
Drought occurrence evaluation in localities of Venezuela	4	661-678
Influence of illumination conditions on germination of somatic embryos of plantain crop hybrid 'FHIA-21'.	4	679-689

***Animal production.***

Birth weight in dual purpose bovine females	4	690-708
---	---	---------

***Food technology.***

Stability of soybean oil conditioned from organic extracts of grapefruit ( <i>Citrus paradisis</i> Macf)	4	709-724
Chemical composition of essential oil from <i>Origanum majorana</i> L. extracted by different techniques and its biological activity	4	725-738
Sequential extraction of Nickel. Chromium and Zinc in a soil of the Valencia Lake basin and its accumulation in sorghum plants	4	739-762
Effect of storage time under refrigeration on the cob quality of the "Delicia" super sweet hybrid ( <i>bt1</i> )	4	763-779
